

**NSW North Shore Electricity Prices Domestic Alltime (all figures are GST inclusive) 2001 to 2015**

Brief analysis by Dusan Baljevic from data collected on the Internet (for the love of matematics because it is more than ever expensive to pay for utility bills!)

Only standard, non-discounted tariffs are reviewed

Errors, if they exist, are accidental and unplanned

**Summary: The most dramatic part of price increases in period 2001-2015: Service Availability (Daily Supply Charge). In other words, even without using any electricity, just for being connected to the supply grid, owners pay several hundred percent more in 2015 than in 2001.**

Legend:

EA EnergyAustralia

OE Origin Energy

IE Integral Energy

AGL Australian Gas Light Company

Price changes usually happened in July each year

On 1st of March 2011 TRUenergy merged with EnergyAustralia and Origin Energy with Integral Energy and Country Energy

NSW Government announcement: Removing electricity price regulation will promote greater competition in the market, encourage more retailers to operate in NSW and offer better electricity deals. From 1 July 2014 NSW electricity prices will no longer be regulated.

Price regulation is being removed after the Independent Pricing and Regulatory Tribunal (IPART) and the Australian Energy Market Commission (AEMC) released reports in 2013 finding the State's electricity market is competitive, price regulation is unnecessary and the AEMC went on to say that regulation may be inhibiting price competition.
